Art Unit: 1712

1. The terminal disclaimer filed on 9/14/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,858,697 has been reviewed and is accepted. The terminal disclaimer has been recorded.
2. Applicants do correctly note that US 10/650,282 has neither a common inventor nor a common assignee as the instant application. Thus no double patenting rejection is proper. Also, the parent applications for this CIP application do not teach the addition of a free radical polymerization inhibitor and thus this subject matter does not have the benefit of an earlier filing date. The Examiner apologizes for making this improper rejection.
3. Claims 4 to 7, 10, 11, 13 and 14 are allowed. None of these claims are taught or suggested by the prior art and have been properly disclaimed over 6,858,697. Similarly claims 2 and 3 are objected. Note the reasons for allowance in 10/029,892. Applicants' amendment, however, has raised the following new ground of rejection.
4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. **The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.**
5. Claims 1, 8, 9 and 12 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 28, 6, 7 and 25, respectively, of prior U.S. Patent No. 6,858,697. This is a double patenting rejection. While the exact wording is slightly different in these sets of claims, when the claims of an application are not the "same" as

Art Unit: 1712

those of a first patent, but the grant of a patent with the claims in the application would unjustly extend the rights granted by the first patent, a double patenting rejection under nonstatutory grounds is proper.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday to Wednesday and Friday, 10am to 4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on (571) 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
